

POWERALLPDW

Power Banks - Power Banks

Our best-selling power bank charger, now upgraded: 10,000 mAh with 15W wireless charging and integrated stand. Power Delivery (PD) technology for faster charging up to 22.5W. You'll be able to charge your tablet and phone faster than ever. Includes all necessary cables to charge any device: built-in Type-C and Lightning cables, plus USB A and Type-C ports to connect your own cables. You won't need to carry anything else.

New: LCD screen showing precise remaining charge level and practical retractable kickstand to comfortably use your phone while charging. Wireless charging included! MagSafe compatible for cable-free charging.

Important: The Lightning cable is not MFI certified and we have detected that the built-in Type-C cable is not compatible with the new iPhone 15, but it is compatible with other phones with Type-C connectors.
