LED - LED lamp

The secret of a good selfie is lighting, and this premium selfie light ring for iPhone and Android devices is the solution.

All you have to do to get the perfect illumination for your Selfie is connect the ring of gel light near the camera and take the perfect picture. In addition, you can use the ring of light as a flashlight.

3 levels of intensity: the selfie light for iPhone and Android smartphones has three different levels of intensity ranging from warm white to cool and mixed, all perfect for enhancing your natural features.

The selfie light ring is very light and easy to put in your pocket, so you can get the perfect selfie anywhere.

Features

- The ring light has 36 LEDs that will create the perfect lighting for your selfie
- Compatible with any smartphone or tablet iPhone or Android
- Has a silicone gel layer that protects the device from scratches
- Rechargeable lithium battery
